

# The Solihull Approach in Wrexham

We have delivered numerous 2 Day Foundation trainings to a range of practitioners: Health Visitors, Social Workers, Family Support Workers, TAC staff, Preschool Development teams, family centre staff...

*"Thank you - it's the best training I've done in years"*

*"Anyone working with children should access this training"*

*"Fantastic course, new health visitors shouldn't practice unless they've done this first!"*

*"A wonderful and vital training programme, extremely relevant to practice"*

We have also delivered revised sessions for Children's Branch student nurses, and introduced the student Health Visitors at the local university to the Solihull Approach

*"This has been the Eureka moment in my training"*

*"This training needs delivering at the start of all SPCHN training as the basis for best practice"*

We are cascading the Parenting Group Facilitators' training too, so new recruits can get involved in running the *Understanding your child's behaviour* groups for parents.

*"I have changed so much as a parent and view my daughter so differently now"*

*"Learnt not to expect miracles from my child"*

*"What am I going to do with my Wednesday mornings, I'll miss group so much!"*

**We feel as passionate about the Solihull Approach now as we did when we were first trained in 2007!**
